About IFAWPCA

The story of IFAWPCA, or the International Federation of Asian and Western Pacific Contractors’ Associations, replicates the story of the regional construction industry after the World War II. A story which began with a vision, born in a region devastated by conflict-and whose people neither lost their faith to rebuild their lands, nor their courage to face the odds that loomed in the horizon.

A dynamic international organization, IFAWPCA plays a critical roles in promoting international fellowship and cooperation, developing beneficial relationship between governments and contractors in the region, and establishing cooperative working arrangements in furtherance of civil and building construction projects.

For over fifty years, IFAWPCA pursued the need for exchange of ideas, experiences, and construction technology amongst its members and affiliates in different climates and geographical settings.

From its inception in Manila, Philippines in 1956, pioneered by only eight (8) founding members, IFAWPCA today groups the fraternity of Builders in nineteen (19) countries of ASEAN and its neighbours, to the South-Asian capitals of New Delhi and Colombo including South Korea, Japan, Australia and New Zealand.
